Object: Letter of recommendation for BOUKHRIS Mohamed Lyazid for a mobility program at university of Sherbrooke.

To Whom It May Concern,

I'm writing this letter to recommend BOUKHRIS Mohamed Lyazid, a current third year undergraduate student in the department of computer sciences, at Polytech Marseille.

BOUKHRIS Mohamed Lyazid took my courses in Linux OS during the first semester of the current year. This course consists of an introduction to operating systems, with a particular focus on the practical aspects as Linux commands and Shell scripts. He passed the test, obtaining the best mark.

More generally, BOUKHRIS Mohamed Lyazid's overall results have been very good so far. Especially, they are excellent in algebra and logics. His skills and seriousness made him in the top 10% of the class of 30 students.

Also, BOUKHRIS Mohamed Lyazid is taking two others of my courses, on automata theory and on introduction to compilers. Although these courses are still in process, I have learned a great deal about him and his abilities. His enthusiasm and energy make him a pleasant student, and he often helps his classmates.

For these reasons, I warmly support the application of BOUKHRIS Mohamed Lyazid for a mobility program at university of Sherbrooke.

Yours sincerely,

Nicolas Baudru
Associate Professor at Aix-Marseille Université (AMU),
In Laboratoire d'Informatique et Systèmes (LIS)
